1. Introduction

Welcome to my second report as ICCF Qualifications Commissioner.

It is my pleasure to sincerely thank all members of the QC team for their dedicated and engaged work – without the support of the members of the team the life of the QC would have been much harder. Their support, concrete input and valuable advice is always helpful.

The team has been working on few projects and the results are presented as congress proposals:

- 2017 – 036 ICCF Norm Optimized Tournaments
- 2017 – 020 Medals for CCE and CCM titles

The rationale of both proposals is mentioned in the respective sections of the ICCF server.

I ask Congress to accept these proposals.

For next year among other things the QC team intends to submit a proposal about the refinement of direct norms/titles.

Since the last Congress the following number of titles has been checked, verified and awarded:

4 GM, 6 SIM, 42 IM, 242 CCM, 435 CCE, 6 LGM , 6 LIM, 3 IA (744 titles in total).

This report won't bother the reader with the details of the sometimes difficult and time consuming process of checking the norms and titles – the report presents only the results.

There are no special applications or special cases this year.
